
"download ebook pengantar sosiologi soerjono soekanto" would not exist without the article titled "The 37 Best Websites to Learn Something New". Forget overpriced schools, long days in a crowded classroom, and pitifully poor results. These websites and apps cover myriads of science, art, and technology topics. They will teach you practically anything, from making hummus to building apps in node.js, most of them for free. There is absolutely no excuse for you not to master a new skill or expand your knowledge or eventually boost your career. You can learn interactively at your own pace and in the comfort of your own home. You can download a book or a video or a subscription to a podcast. There are hands-on tutorials and free videos. I've tested them all and picked the ones that stand out from the crowd. I use the term "websites" to refer to web resources. I've ruled out apps for this article because their interface can differ from one platform to another. In case you're too lazy to read the article, here's the list: In no particular order, here are my top picks:

Books On Writing: "Storytelling Secrets from the Greatest Authors of All Time," by Robert McKee is an instruction manual on storytelling and writing for screenplays, novels, poems, and essays.

Books on Writing: "Stein on Writing," by Sol Stein is a book that will improve your reading and writing skills.

Books On Writing: "Effective Executive," by Peter Drucker is a book which will make you think about leadership, decision making, and work in general in a new light.

Books on Writing: "The Art of Readable Code," by Dustin Boswell and Trevor Foucher doesn't teach you how to code but makes you aware of the importance and the art in writing code and how it's read.

Books on Writing: "The Elements of Eloquence," by Mark Forsyth is a primer that reveals the rules behind effective literary composition.

Books on Writing: "Tree of Life: Plants and People in the Ancient World," by Christopher Jones is a primer that teaches you how to recognize plants and identify species.

Books on Writing: "Algorithms to Live By," by Brian Kernighan is a primer that teaches you how to recognize important algorithms.

Books on Writing: "The Code Book: The Science of Secrecy from Ancient Codes to Quantum Cryptography," by Simon Singh is a primer which reveals many forms of code and weaves together secrecy and science.

Books on Writing: "Fluency: the Art of writing in English," by Katherine Goldstein is a book which will improve your reading skills.

Books on Writing: "Accidence Will Happen," by Patricia T. O'Conner is a book which will improve your writing skills.

Books on Writing: "The Elements of Style," by William Strunk Jr. and E.B. White is a book which acts as a guide in the art of writing.

Books On Writing: "On the Subversion of The Word," by Norman Mailer is an instruction manual on writing and literature; Mailer's unconventional views will inspire you to think about writing in an unorthodox way.
